Fire
Extinguishers App

Save time and maximise safety

Fire Extinguishers is an advanced app designed to manage, control, and monitor fire extinguishing and safety equipment in one or more industrial enterprises. Its **primary function** is to track the lifecycle of fire extinguishers, hydrants, and monitors, from purchase through storage to disposal. Its ability to scan a barcode using a smartphone makes it much easier to inspect the equipment regularly. As with any life-saving device, it is absolutely essential that fire extinguishers are operational and readily available for use in an emergency.

Make safety checks
a routine procedure

Managing the electronic record-keeping process for fire and safety equipment has never been easier. The server part of the Fire Extinguishers app includes a comprehensive database and connectivity for a **web client from a browser on a PC, tablet, or smartphone.** However, our solution also offers management via **a mobile app for Android devices**. Both the web and mobile apps have intuitive controls and comprehensive features to speed up and simplify extinguisher management while supporting a hierarchical structure and providing the ability to set responsibilities and competencies for each user.

Key features

Quick **device identification** thanks to the ability to read barcodes directly from the smartphone

Detailed records of fire extinguishers, hydrants, and monitors

Movements of fire extinguishers to/from service, their dispatch/receipt from repair and their removal from the register

Recording the status of fire extinguishers and simplifying the inspection of fire extinguishers

Fe

Recording repairs along with spare parts and costing

Detailed reports on firefighting equipment, operations carried out by personnel, etc.

Easy **management of application data content** (manufacturers, warehouses, enterprises, plants, etc.)

Alerts for overdue checks based on pre-defined time intervals

Support for **complete localisation of the application** into the required language

Management of fire and safety equipment for multiple companies with specific settings and records

Hierarchisation of the management structure and setting responsibilities and competencies for each user

Advantages of using the Fire Extinguishers App

- **Simple and intuitive** graphical user interface
- Help for organisations in **maintaining a digital record** and complying with legislation
- **Reduction of the time and effort** to register fire extinguishers without the need for additional equipment
- **Ability to generate detailed extinguisher reports** for systematic archiving
- **Access to fire extinguisher records and checklists** from your smartphone and in the field
- **Ability to manage fire extinguishers of multiple companies** with separate records for each company
